

ALANNA SAN LUIS

• 630.957.7368 • alannasanluis@gmail.com • Bolingbrook, IL

HIGHLIGHTS OF QUALIFICATIONS

- Participated in CyberQuest Winter competition, a nationwide cyber competition.
- Applied problem-solving, networking skills, and technical analysis skills in hand-on Cybersecurity Challenges.
- Hands-on experience with Windows and Linux systems, Active Directory, system hardening, and virtualized environments.
- Applied networking and troubleshooting skills through packet analysis, TCP/IP, DNS, DHCP, wireless networking, and cyber security homelabs.
- Strong problem solving, communication, and teamwork skills developed through clubs, projects, competition, and research.

SUMMARY OF TECHNICAL QUALIFICATIONS

OPERATING SYSTEMS:

- Windows 10/11 (basic), Windows Server (basic), Active Directory, Kali Linux, Unix, Linux, VMWare, VirtualBox

NETWORKING:

- TCP/IP, DNS, DHCP, Packet Analysis, Networking configuration, and troubleshooting of LAN, WAN, Cloud, and Wireless systems (basic)

SECURITY:

- Wireshark, System Hardening, Group Policy Object (GPO), Role-Based Access Control (RBAC), Access Control, Autopsy, FTK,

SECURITY INFRASTRUCTURE:

- Firewall Rules Configuration, Network Segmentation

PROGRAMMING LANGUAGES:

- Java, Python, SQL, Assembly, Javascript, HTML, CSS

DATA SCIENCE AND STORAGE:

- Matplotlib, MySQL, PostgreSQL

EDUCATION

Bachelor of Science in Cybersecurity
Lewis University, Romeoville, IL
Minor in Computer Science

Expected: December 2026

PROJECTS

Network and Threat Traffic Analysis | Wire Shark: Personal

- Performed hands on packet capture and protocol inspection using Wire Shark to inspect network data flow, traffic patterns, and evaluate potential security vulnerabilities.
- Evaluated potential security vulnerabilities and connectivity issues in a controlled test environment.
- Applied network troubleshooting and analysis to investigate traffic behavior and potential security issues.

Windows Active Directory | Personal Lab

- Configured a Windows Directory Active environment, including user accounts, security groups, organizational units (OUs), and domain-joined systems.
- Implemented Group Policy Objects (GPO) to enforce password requirements, account restrictions, and system security policies.
- Managed authentication, authorization, and role-based-access controls to strengthen domain security and prevent unauthorized access.

Host-Based Threat Detection and Linux System Hardening Lab

- Collaborated on a 2 person team to harden virtualized Linux systems by implementing security features such as patching, secure SSH configuration, firewall rules, and password policy enforcement.
- Reduced system attack surface by disabling unnecessary services and implementing security control to mitigate potential threats,
- Tested system's functionality after security changes and documented configurations, testing results, and hardening procedures.

COMPETITION

CyberQuest Winter Competition - US Cyber Challenge

December 2025

Online

- Performed network traffic capture and remote access configurations under strict time constraints to identify potential security risks and anomalies.
- Solved real-world cybersecurity challenges by conducting digital forensic investigations and vulnerability assessments to identify security weaknesses and support incident response efforts.

EXPERIENCE

Student Researcher

June 2026 - August 2026

SURE Program, Lewis University

- Assisted in undergraduate research combining aviation and data science to support seasonal eVTOL route planning.
- Conducted aviation data research using Python, Pandas, and SQL to collect, clean, troubleshoot, and analyze large datasets for eVTOL route planning.
- Integrated aircraft trajectory and weather datasets from multiple sources, ensuring data accuracy through validation and preprocessing.
- Prepared analysis-ready datasets by troubleshooting data inconsistencies, standardizing timestamps, and organizing records for statistical analysis.

Coding Mentor

June 2025

Girls Create with Technology, Lewis University

- Mentored 16 middle- and high-school students in programming fundamentals using Java and block based Microsoft Makecode platform.
- Built understanding on core coding concepts through hands-on Microbit robotics project, fostering creative thinking and problem-solving skills.
- Guided students in debugging and troubleshooting coding issues during partner-based Microbit robotics projects, strengthening teamwork and communication skills.

Greeter

July 2023 – Present

Meijer, IL

- Served as the first point of contact, ensuring customer satisfaction, safety, and operational excellence.
- Coordinated with management and security teams to maintain compliance and ensure efficient incident response.

LEADERSHIP, ACTIVITIES, AND VOLUNTEER EXPERIENCE

- Member, Association for Computing Machinery's Council on Women in Computing, 2024 – Present
Vice President, 2025 – Present
Treasurer, 2024 – 2025
- Member, Girls Who Code, 2024 - Present
- Member, DataSAIL, 2026 - Present
- Mentor, Girls Create with Technology, June 2025 - June 2025
- Participant, Grace Hopper Celebration, November 2024
